Air*Fiber*© Microwave Wireless Solution

Vista Broadband uses cutting edge technology that is lightning fast, reliable, and scalable to ensure that we are bringing you the very best in microwave wireless Internet access solutions. With the use of carrier class microwave wireless equipment, you can experience wireless connectivity that is both transparent to your operations and empowering to your continued success. From the innovators that brought high speed Internet to the airwaves, businesses like yours can now benefit from Vista's next generation, extremely powerful Internet service that has broken beyond the limitations of conventional copper and fiber.

With symmetrical speeds from 1Mbps to 1Gbps, our business customers enjoy a class of Internet unsurpassed in reliability, scalability, speed and service. Replace traditional T-1 service with our Air*Fiber* and break the barrier of copper to scale your bandwidth to quickly meet new business demands or enjoy the speed and reliability of fiber through the long reach and flexibility of microwave wireless.

Vista*Fiber*© Fiber Optic Solution

In today's market, fast and reliable connectivity to the World Wide Web is an absolute necessity. Vista proudly offers its Ethernet over Fiber Optics solutions for those businesses looking to deploy today's cutting edge connectivity on their network. Experience speeds from 5Mbps up to 10Gbps over fiber to maximize your business potential in the global market place.

Through Vista*Fiber*, harness hypersonic fast speeds and scalability to accelerate your success. Design a fiber solution in conjunction with Vista's world class microwave wireless technology to create your very own custom Vista*HD* solution that brings you the absolute best in diverse media failover.

Vista*SuperT*© Copper T1 Solution

With a proven track record of availability and business acceptance, conventional copper T-1 circuits still share a prominent place in today's networks. Our Vista*SuperT* solution delivers rock solid 1.544Mbps service through traditional copper media that is also tapped into our VistaHD, multi-peered core so that your business can benefit from a well established, reliable technology that has served as a well known industry standard of connectivity.
